

Marine Environment Finishes

Landmark Products Pty Ltd

General

Below are the recommended requirements that Landmark Products advise for powder coated finishes in particular marine locations; if customers specifically request 2 or 3 coat 2-pack painting to suit a particular corrosivity environment we can accommodate this.

Note the Finish options below are the Dulux powder *type*; with specific characteristics for longevity in a marine environment; there are colour ranges with differing list prices within that powder type. For example, some options within the Duratec range are Duratec Zeus or Duratec Intensity, which offer the same level of protection but come in different colours at different price points.

Recommended Finish Requirements

Location	Material	Base	Finish	Warranty *
Breaking Surf	Aluminium	Raw	N/A	N/A
	Mild Steel	N/A	N/A	N/A
>10m from high tide	Aluminium	Raw	Dulux Duratec	10 years
	Mild Steel	HDG	Dulux Duratec	5 years
>1km from high tide	Aluminium	Raw	Dulux Duralloy	10 years
	Mild Steel	HDG	Dulux Duratec	10 years
>5km from high tide	Aluminium	Raw	Any (not considered marine)	Varies
	Mild Steel	HDG	Any (not considered marine)	Varies

* Warranty of the paint / powder / finishes (aesthetic) is separate from the Limited Structural Warranty (10 year / 20 year) but is subject to the same maintenance regimen. Proof of suitable maintenance may need to be provided by the customer at the request of the company to assess the validity of any such warranty claims. The company reserves the right to dismiss any warranty claims where the lack of proper maintenance could be considered a contributing factor to the damage or degradation of the product, where the customer cannot provide proof of suitable maintenance of the product in line with the accompanying maintenance document.

This document to be read in conjunction with the Landmark Products Limited Structural Warranty and Maintenance Guide.
