SOLUTIONS**

LIGHTING SERIES (K800)

Landmark's K800 Solar Lighting System range is the ideal off-grid solution for shelters, restrooms and public spaces.

A 12-volt solar light system can replace the high cost of running a mains power line to a site, decreases power costs and increases safety.

High quality solar panels from a leading manufacturer are matched with AGM batteries for a superior charging performance. The strong and resilient cased light is vandal resistant.

The LEDs emit a 6000 Kelvin natural light and the low power draw of LEDs relieves the high technology battery of high loading.

The micro controller includes an easy time-adjust ability and is fused in the battery enclosure providing a safe reliable system.

A power-saving option to a timer is a passive infra-red (PIR) motion censor.

Solar LED light systems are a superior solution, to provide safe use of community areas and amenities.

The solar panel supplied with your system depends on how many lights in the restroom, and the operating hours required.

Number of lights	Operating hours	Solar panel wattage
	4	110

* Enclosure for control panel is aluminium or stainless steel

Standard inclusions

- Mono crystalline solar panel
- Waterproof, vandal resistant LED light
- Maintenance-free, low-discharge gel battery
- 12-volt blade fuse holder
- IP65 battery enclosure (non-marine grade or marine grade options available)
- Tamper proof screws
