About Landmark

Landmark Products offers a complete, professional open space structure and furniture service throughout Australia and abroad.

From design through to manufacturing and installation, Landmark Products can deliver a total project solution.

With over 30 years' experience, and a team of highly skilful, expert specialists in public use infrastructure, Landmark is committed to exceeding the expectations of our clients, whether for a relatively straightforward project such as to supply street furniture, or for complex, large scale, custom built urban projects.

Design and installation CONCEPT TO FINISH

Why Landmark?

Long life - build quality

At Landmark we understand the demands placed on our products

through public use, and the need to take a whole-of-life approach to these important community assets.

From design through to manufacturing, installation and ongoing maintenance, our products have been designed with visual appeal, durability and functionality front-of-mind. For this reason, we confidently offer a 10-year structural guarantee on restrooms, extended to 20-year if installed by Landmark or a Landmark approved installer.

Widest product range

With Australia's largest range of standard open

space structures and park furniture, there are pre-designed and pre-engineered solutions available for almost every specification, delivering significant time savings, as well as reducing design, engineering and compliance costs.

If needed, all standard products can be modified to suit, or if you are looking for something unique our highly experienced design team can deliver a complete custom solution.

Site specific solutions

Through years of experience Landmark understands the

challenges our diverse country can present in the delivery of open space projects.

By considering and analysing a multitude of factors, Landmark design, engineer and manufacture each product to suit individual site specifications, working with you to select the most appropriate design and materials for the application, location, environment and budget.

Customer service

Landmark Products is committed to ensuring prompt and effective

service from first enquiry through to project completion. Our customer service staff and Project Consultants are expert in their field, and will guide you through the process, making this an easy and hassle-free experience.

It is our mission to ensure that the products you purchase are fit-for-purpose and all things have been considered and communicated effectively.

Installation and project management

Landmark Products is one of the few

companies in Australia that provide a full-service offering from – design, manufacturing, and installation. Thanks to this strategic advantage, Landmark Products' national installation and project management service is renowned nationally for its expertise.

From small installations through to complex projects our experienced project managers and installation teams will work closely with you to ensure the project is delivered on time, to budget, and with an extended structural warranty of 20 years.

Kit-form engineered

Landmark structures arrive flat-packed, ready-to-assemble, with

no on-site fabrication needed. Step-by-step assembly instructions and appropriate documentation are included.

The benefits of kit-form are numerous. With all components pre-cut and pre-drilled, there is less noise, less waste, less disturbance to the environment. Because erection times are so much quicker than traditional construction, there is significantly less on-site disruption. For remote or difficult sites, Landmark's factory-built structures are the sensible solution.

- **Please note:** All plans presented in this brochure are indicative only. For more detailed information, contact your local Project Consultant.

CHANGING PLACES

Specialised public restrooms that allow greater freedom for people with severe and profound disabilities and their carers.

ROOF OPTIONS

What is Changing Places?

Changing Places is an international project which advocates for public toilets with adult-sized change tables and automated hoists in major public spaces, to meet the needs of people with severe and profound disabilities.

Landmark Products specialises in two standard Changing Places Restroom floor plans – Type 1A (no shower) and Type 2 (with shower), but can also create custom, site specific solutions.

K9600 Changing Places - Bibra Lakes, Western Australia

K9600 Changing Places - typical interior

Standard Changing Places inclusions

- Overhead automated hoist (with rechargeable option)
- Accessible WC including backrest and lift-up grab rails
- Two 800mm long horizontal grab rails
- Automatically or remote control operated adjustable height change table 1800mm long with safety rail
- Sanitising wipe dispenser with shelf over
- Integrated wash hand basin
- Hand dryer
- Rubbish bin
- Retractable privacy curtain, wall mounted
- Soap dispenser
- Clothes hook
- Large sling hook
- Automatic door control
- Accessible shower with instant hot water heater (with Type 2 only)
- Commercial vinyl floor

Overhead room hoist

The recommended ceiling hoist uses the XY system or gantry, including two parallel fixed rails and a perpendicular moving traverse rail, providing coverage over the entire room. Safe working load is 180 kg (test load up to 300kg).

Change table

Remotely controlled by low voltage, and capable of managing 180 kg, the change table is freestanding with two safety sides. There is also a sanitising wipe dispenser.

Shower

Where included (in Type 2 or custom design), the shower and shower seat installation is Changing Places compliant. A handheld shower head with a 1500mm flexible hose is provided.

Automatic doors

The automatic doors recommended by Changing Places allow for one button entry, one button locking once inside, occupancy lighting and feature braille tactile signage. Highest security is retained through the national MLAK (Master Locksmith Access Key).

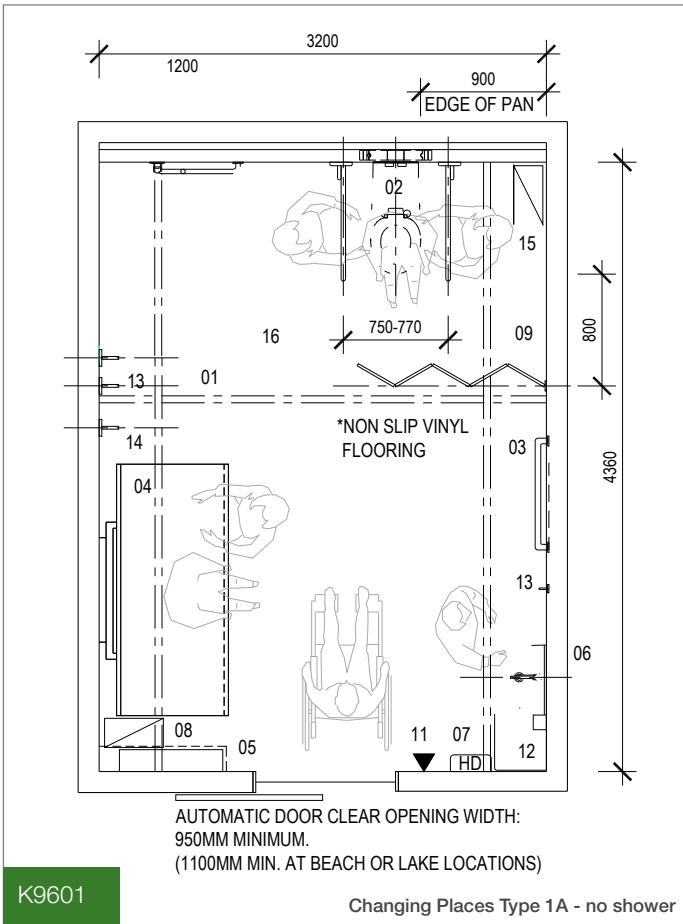

K9600 Changing Places facility - Horsham, Victoria

- COMPLIANCE**
- Blue Accreditation Level: Facilities accredited as Blue Level Changing Places are those built according to one of three Changing Places layouts or based on alternative or modified plans which have been approved by the Changing Places technical advisory team prior to construction.

Cubicle fitout

Standard and optional items

Match the cubicle up with the icon shown on the restroom floor plans throughout this brochure.

There are three standard cubicles available for Landmark restrooms (except Changing Places).

To meet standards, prescribed combinations of cubicles must be in the one structure. For example, if there is only one cubicle, it must be a “disabled cubicle”.

On this page are the standard and optional inclusions in each of the cubicle types (as indicated on each floorplan). Size standards can also apply to each type.

Disabled Cubicle

Standard fitout items

- GR304 Stainless steel disabled pan with back rest, disabled handrails, plastic cistern and stainless steel pan flush button flashing.
- Standard Landmark toilet roll holder
- Chrome plated coat and hat hook with rubber cap.
- GR316 Stainless steel shelf.
- GR304 Stainless steel basin with a self-closing lever action cold water tap (no shroud as standard – see option).
- Signage – AS1428.1 Compliant

Optional fitout items

- Vertical polyethylene baby change table.
- GR 316 Stainless steel mirror
- Adult change table (requires larger cubicle/building footprint)
- Basin shroud (Colorbond or stainless steel)
- Disabled complaint shower (requires larger cubicle/building footprint)
 - Hand held shower including an adjustment rail with mixer tap and floor waste.
 - Fold down 960mm shower seat with a stainless steel frame and a plastic seat.

Ambulant Cubicle

Standard fitout items

- GR304 Stainless steel ambulant pan with ambulant handrails, plastic cistern and stainless steel pan flush button flashing.
- Standard Landmark toilet roll holder
- Chrome plated coat and hat hook with rubber cap.
- GR304 Stainless steel basin with a spring closing cam or button action cold water tap (no shroud as standard – see option).
- Signage – AS1428.1 Compliant

Optional fitout items

- Basin shroud (colorbond or stainless steel)

Standard Cubicle

Standard fitout items

- GR304 Stainless steel standard pan with plastic cistern and stainless steel pan flush button flashing.
- Standard Landmark toilet roll holders

Optional fitout items

- Basin shroud (colorbond or stainless steel)
- Signage – AS1428.1 Compliant

Other options

- Urinals (tear drop or trough)
- Brass vandal proof keyed tap with hose mount (external or in service duct).
- Hot Water Systems
 - Electric instant or electric storage units
- Porcelain toilets and basins
- Hand Dryers (electric)
- Paper towel and soap dispensers
- Sharps Containers

More Information

Power to save Solar LED

LIGHTING SERIES

Landmark's K800 Solar Lighting System range is the ideal off-grid solution for shelters, restrooms and public spaces.

A 12-volt solar light system can replace the high cost of running a mains power line to a site, decreases power costs and increases safety.

High quality solar panels from a leading manufacturer are matched with gel batteries for a superior charging performance. The strong and resilient cased light is vandal resistant.

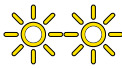

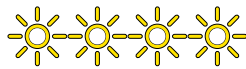

The LEDs emit a 6000 Kelvin natural light and the low power draw of LEDs relieves the high technology battery of high loading.

The micro controller includes an easy time-adjust ability and is fused in the battery enclosure providing a safe reliable system.

A power-saving option to a timer is a passive infra-red (PIR) motion sensor.

Solar LED light systems are a superior solution, to provide safe use of community areas and amenities.

The solar panel supplied with your system depends on how many lights in the restroom, and the operating hours required.

Number of lights	Operating hours	Solar panel wattage
	4	80
	12	80
	Sensor	80
	4	80
	12	150
	Sensor	80
	4	80
	12	150*
	Sensor	80
	4	150
	12	150*
	Sensor	150

* Enclosure for control panel is aluminium.

Standard inclusions

- Poly crystalline solar panel
- Waterproof, vandal resistant LED light
- Maintenance-free, low-discharge gel battery
- 12-volt blade fuse holder
- Controller in IP65 battery enclosure (non-marine or marine grade options available)
- Tamper proof screws

- Pine flats and if painting is required
- Powder-coated aluminium

STRUCTURAL RATING UPGRADES FOR CYCLONE REGIONS

By default, all Landmark restrooms are designed to comply with a wind rating which is consistent with standards required for non-cyclonic regions of Australia.

Assessing the appropriate wind rating for the location of a shelter requires considering the surrounding terrain, the topographic effect, shielding and design factors.

Landmark Products will manage this entire process, and if necessary, design your structure with a ratings upgrade.

STAINLESS STEEL ANTI-VANDAL FASTENING SYSTEM

Comes with a matching key, the system deters vandals, and reduces theft and destruction.

ROOFING UPGRADE FOR HIGH CORROSIVE ENVIRONMENTS

For structures built in highly corrosive environment, such as near a beach or estuary, Landmark will recommend upgrading the upgrade of steel roofing to Colorbond® Ultra™.

Ultra™ comes in only four colours (see Roofing Colour chart on website).

TRACEABILITY PLAQUE

All Landmark products carry an individual serial number so all product information is readily available in the event of maintenance requirements.

THE LANDMARK ATLAS

If a restroom in the catalogue doesn't meet your specific need, ask your Project Consultant about the Landmark Atlas, a comprehensive directory of pre-engineered, completed modified and custom designs.

CERTIFICATIONS

IS ISO 9001 Certified

This internationally recognised accreditation assures the highest quality standard of manufacture - Landmark is safe, consistent, meets customer expectations, continuously improves and complies with the law.

IS BS OHSAS 18001:2007 Certified

This international Occupational Health and Safety Management certification demonstrates Landmark Products' commitment to sound occupational health and safety performance.

All Landmark structures meet or exceed the National Construction Code (NCC), and other relevant Australian standards including:

- AS1170 Structural Design Actions
- AS 1720 Timber Structures
- AS 4100 Steel Structures
- Plus many others

Our restrooms are designed with CPTED (Crime Prevention through Environmental Design) principles as paramount.

Materials and Finishes

All materials used in our public restrooms are sourced from carefully selected suppliers, known for consistent quality. As a certified ISO 9001 manufacturer offering a 25-year limited structural warranty, Landmark is committed to the highest quality processes to produce consistent, reliable products.

TIMBER

All our timber components are factory stained with our standard CD50 oil-based stain.

Pine: Our premium quality plantation hoop pine is stabilised and treated with safe Light Organic Solvent Preservatives (LOSP) to Hazard Level 3. LOSP treatment is used for structures subject to moist environments, preventing fungal decay of timber.

Hardwood: Our hardwood is select grade, sustainably harvested Western Queensland Hardwood (Spotted Gum or similar), ACQ treated to Hazard Level 4. Hardwood is graded F14 or better (the majority being F17). Ammoniacal Copper Quaternary (ACQ) preservative treatment provides greater safety of storage and application than CCA, yet retains similar performance. Landmark do not recommend painting hardwood.

Rosewood, an attractive and long-lasting timber, is used for timber screens. This too can be stained.

METAL

Steel: Mild-steel, hot-dipped galvanised to comply with AS/NZ 4680 standard, steel can be powder-coated to provide hard-wearing protection and a colourful, attractive finish. For higher level protection, two-pack epoxy paint or thermoplastic coatings can be applied.

Aluminium: Chosen for its resistance to corrosion, aluminium is about 30% as strong as steel, so it is used selectively.

Design and Installation

DESIGN SERVICES

Although we have an extensive range of standard products (which can be modified to your needs), when it comes to custom products, our design process starts with our customers.

A concept that starts in the mind of a developer, an urban planner or landscape architect, can become a place of community and a hub of activity thanks to collaboration with Landmark's experienced design specialists.

For custom work, Landmark's talented design team listen and seek a full understanding of the vision and purpose of each project. The starting point can be an in-depth consultation session, client's providing a few sketches on a page, or a comprehensive set of CAD drawings.

Whatever the starting point, Landmark's design team can "add flesh to the bones", and begin to add the intricate specifics and attention-to-detail needed to complete a project that, at the very least, meets our customers' needs. Ultimately our aim is to exceed expectations.

When it comes to bigger projects, Landmark Products understand that collaboration with other professionals is the key to cutting-edge, multi-faceted design, and our track record of working with landscape architects, urban designers, various consultants and other infrastructure specialists is second-to-none.

INSTALLATION

All Landmark structures are fabricated to be easy-to-install, delivered fully constructed in kit-form with instructions that makes on-site installation faster with less noise, lower environmental impact.

Our products take days or weeks to install on-site where traditional construction methods can take weeks or months.

Landmark's Installation Service includes both project management and the actual installation of the structures, with our own highly experienced installers and a select group of sub-contractors at the ready. Landmark is a licensed builder.

Project Management

Our dedicated Project Managers oversee the delivery and installation process with great attention to detail and quality. They are skilled professionals with experience in relevant construction methods.

On-Site

Landmark installation teams are highly skilled professionals with many years of building and construction experience. They are committed to providing a safe site environment for both themselves and the community.
